

PEIA furthers its mission through three types of activities: **Events**

Such as the such as the Charting Our Energy Future series of forums, issue-specific discussion workshops and networking receptions.

Energy Breakfasts

Informal, early-morning discussion meetings featuring a presentation by an authoritative speaker on a current subject, with plenty of opportunity for questions, comments and interaction among all those attending. Speaker's presentations are provided when permission has been granted

To register for any of our Energy Breakfast meetings, please register online.

Projects

To promote action by: defining and evaluating issues and options; formulating strategies and plans for action; communicating with stakeholders and decision makers about progress.
