

Charting Our Energy Future Obstacles and Opportunities

November 5-8, 2000

Westin Bayshore, Vancouver, BC, Canada

Overview

The purpose of this conference was “to make a difference” in BC, Alberta & the Pacific Northwest in energy efficiency and innovation. Its aim was to: Bring together energy users, producers and recognized specialists to discuss ways of achieving increased energy efficiency.

Address:

- prices & policies
- the changing shape of the industry
- financing
- innovative systems & technologies
- environmental imperatives
- Promote action, post conference, in key areas where progress has stalled.

Concurrent Sessions

[View a PDF](#) of the Contents and Introduction

- Policy: Policies for efficient energy production & consumption, and the price outlook.
- Technology: Applications to meet environmental standards & economic demands.
- Environment: Climate change, and the twin demands of lower emissions & greater energy needs.
- Financing: Infrastructure development and technology commercialization.
