

Charting Our Energy Future, Waste Not, Want Not PEIA FORUM 2002 April 21-23, 2002 – Vancouver Convention & Exhibition Centre

“Making a Difference” in Energy Efficiency & Innovation in BC, Alberta & Pacific Northwest”
[Download the Program \(PDF\)](#)

The aim of the conference was to:

- Bring together energy users, producers and technical specialists to discuss ways of achieving increased energy efficiency, while ensuring secure future supply.
- Provide opportunities for networking and informed dialogue; for show-casing new technologies; and for development and financing.
- Address: * policies & prices * the changing shape of the energy industry * innovative systems & technologies * environmental imperatives * financing new technologies & infrastructure *
- Promote action, post-conference, where progress was stalled.

The Forum Program

Featured keynote speakers & presenters from Canada, USA and overseas. It was organized in four parallel tracks, with four major themes in each track:

- Tracks: Policy & Planning, Technology, Environment, Financing.
- Themes: Transportation, Efficiency, Planning, Supply.

PEIA aimed to build on conference results to inform public policy and industry strategy by providing producing synopses on key topics to provide insights and options for action.
